QUALITY DESIGN
TIMELESS BEAUTY
LASTING VALUE

Thank you for considering Padox.

Every space we work on starts the same way: with a conversation about how people will actually use it.

Padox began as a small workshop with a simple belief. Ghanaian hands can build furniture that is as beautiful and as durable as anything shipped in from abroad, and it can be delivered on time, at a fair price, by people you can call directly.

Today we take on everything from a single made-to-measure sofa to the full fit-out of an office floor, a hotel wing or a new housing development. We draw it, we build it in our own workshop, and our own team installs it. There is no middleman, so nothing gets lost between the drawing and the finished room.

This portfolio shows what we do, how we work and what you can expect from us. If you are planning a project, we would be glad to visit your site, listen to your brief and give you an honest, itemised quote.

The Padox Team

- 16 Sample project scopes
- 17 Delivery, installation & aftercare
- 18 Working with us
- 19 Where we are heading
- 20 Let's talk

A furniture maker and interior team in one.

Our carpenters at work on sofa frames and cabinet carcasses in the Akim Oda workshop.

Pandex Furniture & Decor is a Ghanaian company that makes custom furniture and delivers complete interiors. We are based in Akim Oda in the Eastern Region and we take on work across the country.

Most clients come to us because they are tired of juggling a carpenter, an upholsterer, a ceiling contractor and an electrician who never quite agree. We bring all of that under one roof and one point of contact.

Our team covers design and drafting, solid wood joinery, upholstery, spray finishing, POP ceilings, wall finishes, lighting and tiling. That means we can take a room from an empty shell to fully furnished, or simply build the one piece you have been struggling to find.

We are proud to make things locally. Every order keeps skilled work, and the money it earns, here in Ghana.

Design

Site measurements, layouts, drawings and material boards before anything is built.

Make

Furniture and joinery built by hand in our own workshop, not bought in and rebranded.

Install

Our own fitters deliver, install, finish and clean up, then hand the space over to you.

What drives us.

OUR VISION

To be one of Ghana's most trusted furniture and interior brands, known for honest craftsmanship, fresh design and spaces that make people feel at home.

OUR MISSION

To design and build furniture and interiors that look good, feel comfortable, work hard and last, while giving every client real value and service they can rely on.

Reviewing plans, finishes and fabric samples with a client brief in the design studio.

WHAT YOU CAN COUNT ON

It will look right

Good proportions, clean lines and finishes chosen to suit your space, not just the trend of the month.

It will feel right

High-density foam, breathable fabrics and seat heights and depths that suit the way people really sit.

It will last

Kiln-dried hardwood frames, proper joints and tough coatings that stand up to Ghana's heat and humidity.

It will be fair

Clear, itemised pricing, realistic timelines and a team that still picks up the phone after handover.

Six reasons to put Padox on your shortlist.

Whether you are a homeowner, a facilities manager or a developer running a tender, these are the things that make working with us simpler and safer.

01

One contract, one team

Furniture, joinery, ceilings, lighting and tiling handled together. You deal with one project lead instead of five subcontractors.

02

We build it ourselves

Because production happens in our own workshop, we control quality, timing and cost at every stage.

03

Made to your measurements

Every piece is sized to your site and brief. No forcing a standard import into a space it was never meant for.

04

Itemised, honest quotes

You see what each item costs, which materials are specified and what is included, so comparing bids is easy.

05

Built for local conditions

We choose timbers, adhesives and finishes that cope with heat, humidity and termites, and we treat our wood accordingly.

06

Support after handover

A written workmanship warranty, a snag visit after installation and repair and refurbishment services for years to come.

Lower cost than imported furniture, shorter lead times, and a local team accountable for the result.

Locally made furniture avoids shipping, port clearance and long waits for replacement parts. If something needs attention, we are a phone call away.

Our services.

From one statement piece to a full interior, here is the work we take on.

Custom furniture & seating

Sofas, L-shaped couches, accent chairs, dining sets, coffee and centre tables, made to your size, fabric and finish.

Beds & bedroom sets

Solid wood and upholstered beds, headboards, nightstands, dressing tables and complete bedroom suites.

Kitchen cabinetry

Base and wall units, islands, pantries and worktops, planned around how you cook and store.

Wardrobes & TV units

Built-in wardrobes, walk-in closets, TV walls and media consoles with hidden cable runs and lighting.

Office & commercial interiors

Executive desks, workstations, boardroom tables, reception counters, shelving and full office fit-outs.

POP, walls, lighting & tiling

POP ceilings, wall panelling and textures, cove and feature lighting, floor and wall tiling.

REFURBISHMENT & REUPHOLSTERY

SPACE PLANNING

3D VISUALS

BULK & CONTRACT ORDERS

SITE SUPERVISION

Built for the way each client works.

Private homes

Single rooms or whole houses. We help homeowners furnish new builds, refresh tired rooms and find pieces that fit awkward spaces.

Corporate offices & banks

Reception areas, executive suites, open-plan workstations and boardrooms that reflect your brand and stand up to daily use.

Hotels, restaurants & lounges

Repeatable guest-room packages, banquette seating, bar counters and lobby furniture made to a consistent standard across every unit.

Schools, churches & institutions

Strong, easy-to-maintain desks, chairs, pews, lecterns, library shelving and staff room furniture supplied in volume.

Real estate developers & contractors

We supply fitted kitchens, wardrobes, doors, vanities and show-unit furniture for estates and apartment blocks, priced per unit and delivered to your construction schedule.

Where the work really happens.

Cutting a mortise and tenon joint in mahogany. We join our frames properly instead of relying on nails and staples.

Fabric being fitted over a high-density foam sofa frame.

Everything we sell is made in our workshop in Akim Oda. That is how we keep a close eye on quality and how we can promise realistic dates.

Our production is split into clear stages so that each piece passes through skilled hands and gets checked before moving on.

Timber preparation. Selecting, seasoning, treating and machining hardwood.

Joinery & carcass work. Frames, cabinets, doors and drawers built and dry-fitted.

Upholstery. Webbing, springs, foam layering, cutting and sewing covers.

Finishing. Sanding, staining, sealing and lacquer or paint finishes.

Quality check & packing. Inspection against the drawing, then wrapping for transport.

Large or repeat orders

For contracts that involve many identical units, such as hotel rooms, classrooms or apartments, we build an approved sample first. Once you sign it off, every unit is produced and checked against that sample.

What goes into a Pandox piece.

Hardwood, fabric, leather and hardware samples we use to agree finishes with clients.

COMPONENT	OUR STANDARD
Timber	Kiln-dried or properly seasoned hardwoods such as mahogany, odum (iroko), sapele and wawa for internal frames, treated against termites and borers.
Boards	Moisture-resistant MDF, marine plywood and veneered boards for cabinetry, chosen per room (kitchens and bathrooms get moisture-resistant grades).
Joints	Mortise and tenon, dowel and corner-blocked joints, glued and screwed. No frame relies on nails alone.
Seating	High-density foam with a soft top layer, serpentine springs or elastic webbing, and fibre-wrapped cushions that hold their shape.
Fabrics	Durable upholstery fabrics, leather and leatherette, selected with the client for wear rating and ease of cleaning.
Hardware	Soft-close hinges and runners, solid handles and fixings sized for the weight they carry.
Finishes	Stains, sealers and lacquers or paints applied in layers and sanded between coats for an even, hard-wearing surface.

Specific materials are confirmed in writing on every quote, so you know exactly what you are paying for.

Seven clear steps, from first call to handover.

You always know what stage your project is at, what comes next and what we need from you.

1

Consultation

We talk through your needs, budget, style and timeline, by phone or in person.

2

Site visit & measurements

We measure the space, check access, power points and ceiling heights, and take photos.

3

Design & quotation

You receive layouts, drawings or 3D visuals, a materials schedule and an itemised quote.

4

Approval & agreement

Once you approve designs and samples, we sign a simple agreement covering scope, price, payment stages and dates.

5

Production

Your pieces are built in our workshop. We share progress photos and you are welcome to visit.

6

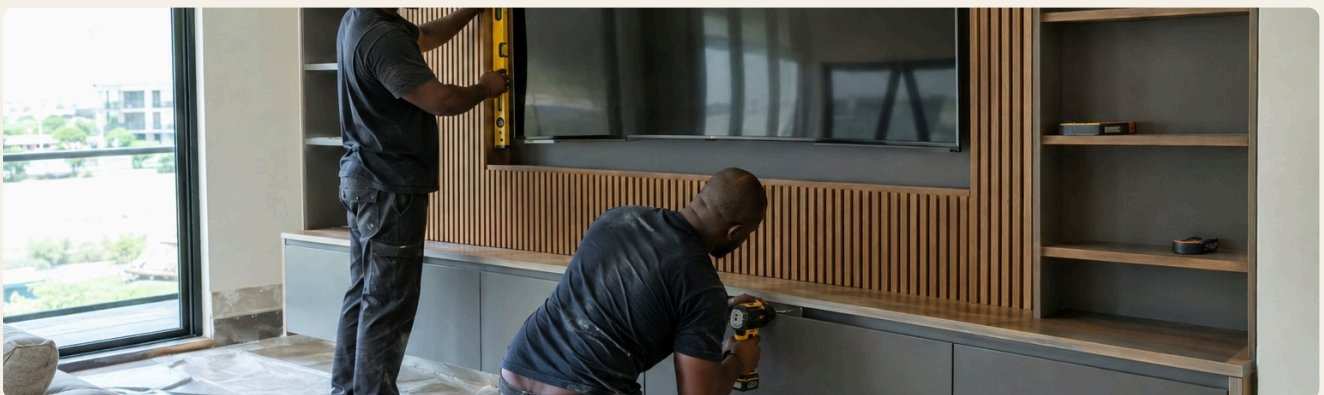

Delivery & installation

Our team delivers, installs and finishes on site, protecting your floors and walls as we go.

7

Handover & aftercare

We walk through the space with you, fix any snags, hand over care instructions and your warranty.

Our installers levelling and fixing a built-in TV wall unit on site.

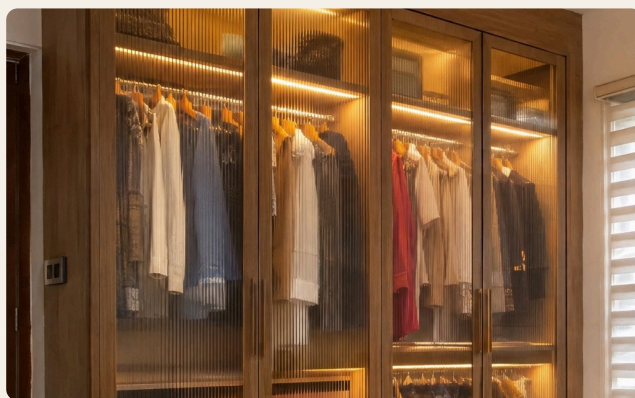

Pieces made for everyday living.

Three-seater sofa with a solid hardwood base. Available in any length, fabric and wood finish.

Six-seater solid mahogany dining set with upholstered chairs.

Floor-to-ceiling wardrobe with glass doors and internal lighting.

Living

L-shaped couches, sectionals, three-seaters, accent chairs, coffee and centre tables.

Dining & bedroom

Dining tables and chairs, sideboards, beds, upholstered headboards, dressers.

Storage & media

Wardrobes, TV consoles, shelving, shoe cabinets and display units.

Living rooms that bring people together.

Design concept: custom L-shaped sofa, fluted timber TV wall, POP ceiling with warm cove lighting.

A good living room has to work hard. It is where families relax, guests are welcomed and the television takes centre stage on match day. We usually start with the sofa, since that is where everyone ends up, and then design the rest of the room around it.

- **Sofas sized to the room**, with deep seats and covers that can be cleaned.
- **TV walls** in timber slats or panelling, with cables hidden inside.
- **POP ceilings** with warm, dimmable cove lighting for evenings.
- **Soft finishes** such as curtains, rugs and plants to warm up tiled floors.

Multi-level POP ceiling with recessed cove lighting and a timber-slat feature wall.

Calm bedrooms. Kitchens that work.

Upholstered wall headboard, solid wood bed base, floating nightstands and fitted wardrobe.

Bedrooms

A bedroom should help you switch off. We keep things uncluttered with built-in storage, soft upholstered headboards and gentle, indirect lighting that is easy on the eyes at night.

Bed frame	Solid hardwood, reinforced slats
Headboard	Padded, fabric or leather finish
Wardrobes	Floor-to-ceiling, built in
Lighting	Warm white LED, concealed

Fitted kitchen with island seating, under-cabinet lighting and generous storage.

Kitchens

We plan kitchens around how you really cook: where the gas cylinder goes, where the big pots live and how much counter space you need on a busy weekend. Then we build them to handle steam, heat and daily wear.

Carcasses	Moisture-resistant boards
Doors	Lacquer, laminate or timber
Worktops	Quartz, granite or solid wood
Hardware	Soft-close hinges and runners

Workspaces that make a strong first impression.

Design concept: executive office with veneered desk and credenza, backlit shelving and a six-seat meeting table.

Curved reception counter with timber fluting and a stone top.

Restaurant banquette seating, solid wood tables and slatted timber wall.

For businesses, furniture is part of the brand. Clients notice the reception desk. Staff notice whether their chairs and desks help or hinder them. We design commercial interiors that look sharp, follow your brand colours and hold up to heavy daily use, and we schedule installation around your working hours to keep disruption to a minimum.

Consistent quality, at volume.

Hotels & guest houses

We produce complete room packages, including bed, headboard, nightstands, wardrobe, desk and luggage rack, and repeat them across every room to the same standard. Robust finishes make housekeeping easier and keep rooms looking fresh for longer.

Schools & institutions

Classroom desks and chairs, laboratory benches, library shelves, church pews and staff furniture. These pieces take a beating every day, so we build them in solid hardwood with strong joints and simple shapes that are easy to repair.

How we handle bulk contracts

Sample first.

A prototype unit is approved before full production starts.

Phased delivery.

Batches delivered to match your building or term schedule.

Unit pricing.

Clear per-unit rates, so budgeting and variations are simple.

Finished pieces wrapped and loaded for delivery from the workshop.

What a typical Pandex job looks like.

These examples show the kind of scope, deliverables and timing clients can expect. Final details are always tailored to the site and brief.

RESIDENTIAL • FULL HOME

Four-bedroom family home

Scope: living and dining furniture, TV wall, fitted kitchen, four wardrobes, beds, POP ceilings and lighting throughout.

Typical timeline: 8 to 12 weeks from approved design to handover.

CORPORATE • OFFICE FIT-OUT

Office floor for 20 to 40 staff

Scope: reception counter, workstations, executive desks, boardroom table, storage, wall panelling and ceiling works.

Typical timeline: 6 to 10 weeks, with installation scheduled outside business hours where needed.

HOSPITALITY • REPEAT UNITS

Guest house or hotel wing

Scope: sample room, then full room packages, lobby seating and restaurant furniture.

Typical timeline: sample in 2 to 3 weeks, then phased delivery by floor or block.

INSTITUTIONAL • SUPPLY CONTRACT

School furniture supply

Scope: student desks and chairs, teachers' tables, library shelving and staff room furniture.

Typical timeline: agreed per batch, planned to arrive before the start of term.

We don't disappear after handover.

Every piece is wrapped and corner-protected before it leaves the workshop.

Floors are covered and work areas cleaned at the end of each day on site.

Delivery

We transport with our own crew and pack everything with plastic wrap, blankets and cardboard corners. Delivery dates are confirmed in advance so someone is on site to receive the goods.

Installation

Our fitters assemble, level, fix and finish everything on site. We protect your floors and walls, remove our packaging and leave the space clean and ready to use.

Aftercare

Workmanship warranty issued in writing at handover, covering joints, frames and installation.

Snag visit a few weeks after handover to check everything is settling well.

Care guide on cleaning fabrics, wood and lacquered surfaces.

Repairs & refurbishment including reupholstery, refinishing and adjustments.

Maintenance plans for offices, hotels and schools that want regular checks.

Simple terms. No surprises.

Ways to engage us

Supply only. We build and deliver; your contractor installs.

Supply and install. We build, deliver and fit everything.

Design and build. We handle design, production, finishing works and installation as one package.

Framework or repeat supply. Agreed rates for organisations that order regularly.

What every quote includes

- Itemised list of every piece and work package
- Materials, finishes and dimensions
- Delivery and installation costs shown separately
- Production and installation timeline
- Payment schedule and warranty terms

Typical payment stages

STAGE	WHEN
Deposit	On signing, to purchase materials and start production
Progress payment	When production reaches an agreed milestone
Balance	On delivery, installation and handover

Percentages are agreed per project. For corporate and institutional clients we can work with purchase orders and milestone certificates.

Documents available for tenders

- Business registration certificate
- Tax identification and tax clearance
- SSNIT clearance
- Company profile and list of completed projects
- Client references on request

OUR PROMISE TO EVERY CLIENT

A named project lead

One person who knows your job and answers your calls.

Written dates

Production and installation dates agreed in writing, with updates if anything changes.

No hidden extras

Any change to scope is priced and approved by you before we do the work.

Growing with our clients.

We have a clear plan to grow our capacity, reach more of Ghana and take Ghanaian craftsmanship further afield.

NOW

Short term

- Upgrade workshop tools to increase output
- Photograph and document every completed project
- Grow our base of homeowners, developers and offices

NEXT

Medium term

- Open client offices in Accra, Kumasi and Takoradi
- Add modern joinery machines, dust extraction and a spray booth
- Launch signature sofa, bedroom and office ranges

BY 2030

Long term

- Supply hotels and developments across West Africa
- Exhibit Ghanaian furniture at international trade fairs
- Build a lasting legacy of African craftsmanship

Training the next generation of Ghanaian craftspeople is part of our plan.

OUR EVERYDAY COMMITMENTS

Deliver quality furniture and interiors, every time

Design pieces that are both fresh and practical

Treat every client with care and respect

Use durable, carefully chosen materials

Train and grow skilled young craftspeople

Expand Padox across Ghana and beyond

Build long-term relationships with clients and partners

Keep improving how we design and produce

Promote locally made Ghanaian furniture

Create spaces that make daily life better
